## AT LAST!

### Treats for Kids With Food Allergies

This new line of baking mixes by Cherrybrook Kitchen was developed by a mom especially for kids who are allergic to peanuts, eggs, nuts, and dairy products. The best thing about them: They taste really good. The next time your child gets invited to a birthday party, bake a batch of either the cookies or cupcakes; then send your kid off with some treats so she

won't be left out when it's time to sing "Happy Birthday." Available at specialty stores and at [cherrybrookkitchen.com](http://cherrybrookkitchen.com) for around \$4.50 per box.
